All teachers have some students who are intelligent and capable, but have weaknesses in "executive function" (EF) skills which impact their performance in the classroom and cause a number of difficulties. In recent years, the role of the brain's "executive functions" on school success has gained a great deal of attention because these functions are the central control processes that enable students to perform goal-directed behavior. Strategies are designed to address the key components of EF, such as: . working memory . prioritizing . metacognition . planning and organizing . activation/task initiation This reference is a valuable tool for all teachers who want to foster development of EF skills and provide specific interventions to help those who struggle. 4 pages. 2011.
